

December 2011

To: Package Supply Customers

From: Andrew O'Brien, President

Re: Recycling services

Package Supply is pleased to support our industry's environmental initiatives by providing recycling services for wire hangers and poly garment covers to qualified customers. In providing those services, we follow the following procedures:

1. Our drivers pick-up from customer's stores wire hangers and poly garment covers that are collected and packed by the store personnel. These pick-ups are made during our regular delivery visits.
2. The material to be recycled is brought to our warehouse facility in Avon and deposited in a designated container. We use "single-stream" recycling to eliminate the cost of, and potential for errors in, sorting.
3. We contract with a permitted waste and recycling hauler to provide "single stream" recycling service. Currently, the hauler picks-up twice weekly.

These procedures, which have been in place since December 2009, ensure that recycled material is handled appropriately and cost-effectively. Please do not hesitate to contact me if you have any questions at 508-583-8066.

Sincerely,
